FOR IMMEDIATE RELEASE:

CEO receives congressional award for Education Sponsorship

(Brooklyn, NY—Jan. 19) Comotiv™ Systems Founder and CEO, Ken Majors, was honored with a congressional award Monday for his support of the Education Technology Think Tank (ET3) and its community-based programs. U.S. Congressman Major Owens of New York's 11th district presented Majors with a plaque bearing the Congressional Seal at the Central Brooklyn Martin Luther King Commission's MLK day celebration.

Titled the ET3 TEC Champion Leadership Award, the plaque touted Majors as being a "Leader Inventing Equitable Futures." Created by Congressman Owens, the award is presented to those individuals from around the country who demonstrate inspired leadership, exemplary service to the nation's underserved youth, and excellence in the fields of community, education and economic empowerment.

"A relationship with the private sector is a vital component to the rebirth of struggling communities everywhere," said Owens. "Comotiv Systems stands tall as an example of business participating in the community, providing tools to inspire and empower our youth."

Comotiv Systems sponsored a NetGeneration of Youth (NGY) team from Brooklyn's Freedom High School this past fall, allowing students to attend the Congressional Black Caucus Legislative Conference. Earlier this month, Comotiv Systems' Collaboration Workspace™ was activated in Brooklyn, Manhattan and the Bronx. Due to this technology, schools and community centers in the boroughs can more easily access and share educational information and ideas online.

Majors' award was presented in Brooklyn along with Verizon's Community Affairs Director Kevin Mahoney, who was also honored at the event.

COMOTIV Systems is an application service provider (ASP), founded in 1999 and headquartered in Portland, Ore. Its Collaboration Workspace is an easy-to-use web-based solution providing a central communication repository through a highly secure audio, video and web conferencing interface.
