FOR IMMEDIATE RELEASE:

COMOTIV™ to sponsor Portland ITEC 2005

(Portland, Ore – Nov. 29) COMOTIV Systems is proud to announce its premier sponsorship of the 2005 Portland ITEC Conference Dec.7-8 at the Convention Center. The Portland Conference is one of two West Coast stops for the tech-based event, with a total of 12 conferences nationally.

As a nationally emerging collaboration software firm, COMOTIV's sponsorship of ITEC aims to further strengthen its Oregon roots while supporting the regional tech industry. Relationships with OHSU and the High Desert Education Service District in Bend have given the Portland-based company solid footing on a statewide level.

Each market is allowed only two premier sponsors among the nearly 100 attendees. COMOTIV CEO Ken Majors saw the value of participating in this year's as twofold and was quick to add his company's support.

"We wanted to increase our visibility locally, of course, but ITEC is also a way to support other emerging tech firms in the Northwest," said Majors. "This region has long supported the advancement of technology and we wanted to be a part of that."

Visitors to COMOTIV's booth will be given the opportunity to try the software first hand, including use of the video conferencing, chatting and document sharing capabilities. Beginning at 10:30 am the first day COMOTIV representatives will be giving live demonstrations of the product every hour, including an appearance by Majors at 11:30 on Dec. 7.

Developed by Centric Events Group, ITEC is North America's largest series of regional business-to-business events, connecting technology buyers with business solution providers in a regional tradeshow environment.

COMOTIV Systems' 21-person staff is headquartered in downtown Portland. Incorporated in 1999, COMOTIV Collaboration™ is a web-based workspace that provides a comprehensive suite of collaboration tools for a flat service fee. Features include multicast, multi-point video; audio conferencing; and extensive project management tools. For more information, please visit the website at www.comotivsystems.com.
